

Are today's healthcare uncertainties getting you down?

As a physician in private practice, there are some practical realities you are facing that you can't avoid but would probably rather not think about:

- Medicine is under Siege
- Physicians are defenseless because they have no power base
- Revenue continues to go down while costs increase - all of which is decreasing your income
- Many physicians, finding that their practices are no longer economically viable, are leaving practice each year

Want to make the best of a bad situation?

The Health Group makes it safe for our physician clients to practice medicine. While there are some situations that even we cannot salvage, most of our clients see fast results and substantial improvement. Our business is your success – we will review your current circumstances and share with you whether and how we can have a positive impact on your practice. There is no cost for our opinion – It's for our mutual benefit. Give me a call – it may be the best decision you'll make this year. *David Loomis, The Health Group*
